

## About me

I'm a passionate front end web developer with over 8 years experience. I've worked on projects ranging from games and micro-sites to large scale applications in small teams under tight deadlines. I have a diverse skill set including a background in design and animation.

## Objective

To work with a creative and dedicated team of individuals building highly functional websites and applications with a focus on good design and user experience.

## Experience

### Senior Front End Developer

**Pathbrite** March 2013 - Current [www.pathbrite.com](http://www.pathbrite.com)

Pathbrite is a large scale ed-tech e-portfolio & courseware application. Features include teacher course creation, student assignment grading, portfolio curation, and top-level administrative tools. I developed several new course, grading, portfolio, and administrative features. I also refactored older features and sections, refactored the entire local-dev & build processes, squashed bugs, wrote automated tests, and improved the application on mobile/touch devices.

### Senior Interactive Developer

**Luxurious Animals** July 2008 - March 2013 [www.luxanimals.com](http://www.luxanimals.com)

I started my career as the first employee of the agency as an interactive designer. I've engineered custom solutions under tight deadlines (individually and in small teams) for websites, games, web apps, and banner ads for clients including HBO, TNT, and Panera Bread among others. I also completed internal projects such as developing and managing the company website.

### Design & Animation Internship

**Big Spaceship** June 2007 - September 2007

Worked on design and animations for various projects alongside the team.

### Freelance Design & Development

**Various Clients** June 2006 - August 2008

Completed design, development, and animation work for various clients.

## Education

**Rochester Institute of Technology** New Media Design & Imaging 2004 - 2008
