

About me

I'm a passionate front end web developer with over 5 years experience in the field. I've worked on projects ranging from games and micro-sites to large scale applications in small teams under tight deadlines. I have a diverse skill set including a background in design and animation.

Objective

To work with a creative and dedicated team of individuals building highly functional websites and applications with a focus on good design and user experience.

Experience

Senior Front End Developer

Pathbrite March 2013 - December 2013 www.pathbrite.com

Pathbrite is a large scale education technology application that allows for teacher course creation, student assignment grading, e-portfolio creation, and top-level institutional tools. During my time as a contractor here I was responsible for developing several new course, grading, and enterprise-level features. I also restructured older features and sections, fixed problems, and improved features on mobile/touch devices.

Senior Interactive Developer

Luxurious Animals July 2008 - March 2013 www.luxanimals.com

I started my career as the first employee of the agency as an interactive designer. I've engineered custom solutions under tight deadlines (individually and in small teams) for websites, games, web apps, and banner ads for clients including HBO, TNT, and Panera Bread among others. I also completed internal projects such as developing and managing the company website.

Design & Animation Internship

Big Spaceship June 2007 - September 2007

Worked on design and animations for various projects alongside the team.

Freelance Design & Development

Various Clients June 2006 - August 2008

Completed design, development, and animation work for various clients.

Education

Rochester Institute of Technology New Media Design & Imaging 2004 - 2008
